

ActiveIdM

Active Identity Management

MICROSOFT CERTIFIED

ActiveIdM is a Microsoft Certified Partner specializing in Microsoft Identity and Access Management technologies.

IDENTITY MANAGEMENT

ActiveIdM's core vision encompasses implementing cost effective Identity Management solutions that provide insight, direction, and focus to your enterprise directory strategy.

DIRECTORY SERVICES

Most enterprises today store personnel identity and access control data in disparate directories, databases, and many other forms of storage. With our extensive background in Directory technologies; ActiveIdM can tailor a flexible and robust solution based on Microsoft Identity technologies, specifically Microsoft Forefront Identity Manager (FIM), Identity Lifecycle Manager (ILM), and Microsoft Identity Integration Server (MIIS).

Identity and Access Management

Active Identity Management, Inc. (ActiveIdM) provides comprehensive solutions for Identity Management rooted in Microsoft technologies. ActiveIdM consultants equip customers to better understand and define their Identity Management business rules. Gathering data and building use case scenarios help prepare for a successful deployment since a solution is not just technology...

- **Automate** enterprise identity, security, and access management using Microsoft's Forefront Identity Manager 2010 (**FIM**)
- Integration of **hybrid** scenarios that couple on-prem applications with cloud technology including **Azure** Active Directory, Intune, Azure Rights Management, and **Office 365**
- Empower business users to create activities and **workflows** to better align business processes with the technology implementation
- Reduce Help Desks costs with delegated **Self-Service capabilities** and options to better manage passwords, groups, and data in your environment.
- Enhance overall physical and network security by improving **tracking** and issuance of identities across your enterprise environments
- Increase **compliance** and **efficiency** in your corporate operations and technology deployments with customized reporting
- Ensure timely **disablement** of terminated users with logging for compliance reporting

IDENTITY ACCESS AND INTEGRATION

With experience in Fortune 100, HealthCare, and Federal/State Government complex Multi-Directory topologies; ActiveIdM has implemented solutions to unite and migrate enterprise access and data. Whether it's a new design or migration from on-prem to Cloud; ActiveIdM has the consultants to meet your needs.

APPLICATION INTERFACES

Integration work requires the ability to provide agile solutions to compliment a project without bogging down the timeline. ActiveIdM provides .Net interfaces and applications to assist in our deployments.

TURNKEY SOLUTIONS

Quality integration and consulting combined with cutting edge technology provide our customers with a solid solution.
